PROFESSIONAL EXPERIENCE

Operations Analyst & PMO, Kasikornbank

Nov 2020-Present

- Participated in demand and supply planning projects as a consultant role with cross-functional stakeholders to ensure proper methodology and accurate results by analyzing business processes, recommending appropriate approaches
- Monitored financial usages of 6 KBank subsidiaries to address potential issues with their operations using reporting tools named Qilk Sense.
- Coordinated closely with managements to ensure all aspects of operation issues will be addressed and organized with company standards.
- Collaborated with stakeholders as a centralized project management unit for supporting end-to-end life-cycle of projects and tracking to ensure all deliverables will be achieved as planned.

Data Analyst& Engineer, Peerpower (Fintech)

June 2019– October 2020

- Initiated an end-to-end solution with a real-time dashboard to prescreen potential borrowers using Python by empathizing users, setting up criteria, and designing, implementing, and maintaining the dashboard led to targeting only potential borrowers saving operation time around 60 percent for the whole process of credit score evaluation
- Conducted in-depth analysis for variable reviews and model methodology of existing credit score system and finding new potential variables aimed at providing the better predictive classification of credit score grading
- Worked on ad-hoc analysis and interpreted insights for decision-making purposes

Intern, Muang Thai Life Assurance

December 2018 – January 2019

- Assisted in conducting financial risk modeling for financial crisis signal detection to enhance prediction accuracies of current risk management tools
- Improved parts of a financial situation report by developing automatic updates for interest rates and yields from ThaiBMA led to time-saving for daily operation using Python.
