SUMMARY

I have experiences interpreter service staff of events MDRT global conference. And I have communicated and interacted with various people by using English skill. Another experiences I have projects are Arduino House control, System analysis and design: Radiology Department System connect to hospital system and Integration Production Management System with Web Service and Mobile Application by using C#, .NET, ABAP programming language.

COMPUTER SKILLS

Languages

- Proficient in: Microsoft Visual C++, C, C#, HTML

- Familiar: SQL, NoSQL, Swift, Java, JavaScript, Python, R, PHP, CSS, DAX

Software

- Database: SAP, Oracle Database, MySQL, SQL Server

- Platforms: Windows Server, Hyper-V, WebSphere, Sybase PowerBuilder, XCode, SAP, MATHLAB, Internet of Thing (IOT), Microsoft Power BI, ASP.NET, IBM WebSphere

---

EXPERIENCE PROJECTS, CERTIFICATIONS

Start Up Thailand: Arduino House Control

King Mongkut University North Bangkok

Date — Feb 2017 – Jun 2017

- Arduino with system to connect internet send data information from sensor back to users.

- Motion sensor, temperature sensor, magnetic door sensor and LED screen display

- This project developed to challenge my teams to contest: Start up Thailand in University.

System Analysis and Design: Radiology Department System

King Mongkut University North Bangkok

Dates — Feb 2019 – Apr 2019

- Developed to followed requirements from a doctor radiology department system that connect data from hospital data integrated with radiology department data and collected to our system.

- Design Demo graphics program of radiology department by Adobe XD

Integration Production Management System with Web Service and Mobile Application

Utac Thai Limited

Dates — May 2019 – March 2020

- Provided agile methodology programming and implementation support mobile application goods receipt direct material, indirect material and assembly material products outside company to be inside. Written by #C. this programming to be connected to SAP on MM module.

- Integration management system with Web Service by IBM WebSphere between two system data of MES system and SAP. Improve data that transfer to SAP and check error events of data that cause problem sending data. To support PP module, FSCM modules and FICO modules control data from MES to SAP.

Licenses & Certification

Dates

- Microsoft: Certified Solution Associate (MCSA) — June 2019

- TPQI-NET Thailand: System Analysis and Design — June 2019

EDUCATION

Montfort College

Chiang Mai, Thailand

Dates — 2009 – 2014

- High School College

King Mongkut University North Bangkok

Bangkok, Thailand

Dates — 2016 – 2020

- Applied Science: Mathematic, Mathematics for Computer programming
