Basic at Internet of Things

EXPERIENCE

Lab Assistant and Tutor

Help freshmen in learning C & Java programming. Provided Performance feedback to the instructor. Hosted tutoring sessions for freshmen in C Java programming as requested by the participants. Provided performance feedback to instructors.

Secretary of the Student Association

Assisted colleagues by supporting them with planning and distributing information. Developed and maintained filing system. Point of reference for all queries, requests or issues in meetings and appointments.

Teacher Assistant

Assisted instructors in preparation classes for pre-freshmen in English. Helped instructors to create multiple exercises quizzes.

National Software Contest

Participate in National Software Contest in the topic of Adversarial attacks on image classification models in the form of QR code

Publication

ICONIP 2020   Author (presenter) of the Adversarial attacks on image classification models in the form of QR code in the Rank A conference of 27th International Conference of Neural Information Processing.

Thesis   Doing a senior project under the topic of Adversarial attacks on image classification models in the form of QR code

Awards and Schorlarship

National Software Contest   Get into finalist in National Software Contest in the topic of Adversarial attacks on image classification models in the form of QR code

Hackathon 2018   Participate in the Hackathon competition in 2018 and get a great design award

Mobility Grant   Get a grant for internship in Japan to research under Kotani Laboratory supervision

Others

SAP Basic Module Training   Attended to a special course provided SAP company to learn the knowledge of company organization

ICT Junior Camp   Attended to ICT Junior Camp 10 as a training assistant in robotic technology
